

# Ledbury Neighbourhood Development Plan

## Progress and how you can help or contribute

The existing Ledbury NDP adopted in January this 2019 is undergoing a process of enhancement with a working party meeting regularly.

It is working on developing a settlement boundary and exploring where they could be located and allocating land for not just housing development, but also for other infrastructure such as where new medical facilities and schools needed could be situated. It is also looking at the best business development sites.

In additional, it is considering the allocation of land for much needed new sporting facilities and ensuring we have lots of green infrastructure for our preservation of biodiversity and wildlife and for recreational purposes.

We are in the appointment of consultants stage to provide the expert planning and technical advice needed to provide our evidence for the decisions made and applying for grants to fund it. The timescale for completion is probably towards the end of 2020/early 2021.

The working party welcomes participation or input from anyone interested in helping and in particular it is looking for anyone with specific expertise that would be useful for separate task groups for the areas of investigation mentioned above.

Please do give us your contact details if interested on contact the Ledbury Town Council Clerk on tel xxxxxx email xxxxx if you would like more information.
